The sturdy and loving "Mr. Moscow" is a real addition to our breeding program. He has produced excellent conformation in his puppies and his happy confident but never mean temperament has much to offer the breed. Unfortunately, since he is only "enrolled for breeding" by the AKC, we cannot present him in the show ring. His puppies are fully AKC registerable. He is a vigorous dog with no health problems to date, full dentition, a scissors bite and a big grin.
